2

Report

Text

3 This document is generated specifically to test the Pandoc extraction pipeline. It

4 tains complex multi-level tables with merged cells and coloured headers,

5 ted bullet and numbered lists, inline text formatting, and multi-paragraph cells

6 all structures that cause Pandoc to emit HTML table tags.

Title

7

Inline Text Formatting

8 **red red text.** *Italic text.* Underlined text. ***Blue + Italic + Blue.***

2 Numbered Steps

- 3 Gather all input DOCX files.
- 4 Run them through the Pandoc pipeline.
- 5 Review the generated Markdown output.
- 6 Verify with the QA team.

Title

7 Simple Product Table

8 This is a standard table Pandoc should render as a GFM pipe table:

9 Product ID	Name	Category	Price (£)	
P-001	Funeral Plan Gold	Insurance	£4,500	
P-002	Funeral Plan Silver	10 Insurance	£3,200	
11 P-003	Probate Service	Legal	£1,800	
P-004	Will Writing Kit	Legal	£299	

Title

12 Complex Merged-Cell Table (triggers HTML output)

13 This table uses cell merging (colspan/rowspan). Pandoc cannot represent this in

14 standard Markdown, so it will emit HTML <table> tags.

15 ANNUAL PRODUCT LIFECYCLE SUMMARY					
Product Details		Financial Performance		Status	
Code	Name	Q1 Revenue	Q2 Revenue	Lifecycle	
P-001	Funeral Plan Gold	16 £1,000	£380,000	Active	
17 P-002	Funeral Plan Silver	18 £200,000	£310,000	Active	
19 P-003	Probate Service	20 £150,000	£145,000	Under Review	

Title

21 Table With Multi-Paragraph Cells

22 Tables with multiple paragraphs also force Pandoc into HTML mode because GFM

23 tables cannot contain newlines inside a cell.

Title

1Structure	Description	Notes
Extraction Engine	Primary: Pandoc (gfm) Fallback: MarkItDown Legacy: Docling	4Configured per router
2Input Format	GitHub Flavoured Markdown (.md)	5Stored in SharePoint

Title

3Important Notes

6documents processed by this pipeline are subject to the
7stage lifecycle: Raw → Draft → Final. No document reaches
8downstream AI systems until it has been signed off by an
9authorised verifier.

Title

10Wide Multi-Column Data Table (forces HTML)

11Table with 8+ narrow columns where the header row spans 2 levels also cannot
12be expressed in GFM — Pandoc will emit HTML.
